

TECHNICAL DATA SHEET

# METALCOTE AG 19

*Lubricating and releasing agent, in grease form, for swab application  
on die face of pressure die casting machines*

## DESCRIPTION

Metalcote AG 19 is a special product based on a very fine dispersion of aluminium and graphite into a selected lubricating grease. Recommended when high release factors and perfect casting surface finish are needed.

**High releasing properties, low dosage required, very high lubricity factors and good even product spreading on hot dies.**

The product is indicated for the lubrication of moving parts of the moulds of die-casting machines intended to produce aluminium castings.

## PRODUCT PHYSICAL DATA

<b>Appearance:</b>	Grease	<b>Color:</b>	Silver
<b>Specific Gravity:</b>	0,9 g/cm <sup>3</sup>	<b>Basic Element:</b>	Graphite-Aluminium

## METHOD OF USE

The product can be applied cold by brush or swab on cold surfaces.

Metalcote AG 19 is supplied ready for use.

## PACKAGING AND STORAGE

20 kg steel pails

Warnings: The product is frost sensitive.

Store at temperatures above 5 ° C and close the package after use.

If properly stored the product shelf life exceeds 12 months.
